### Capacity Europe 2023 Highlights

We would like to thank all our visitors at [Capacity Europe 2023!](#)

Throughout the event, growth remained a prevalent theme among the various developments and ideas discussed. The gathering of industry experts sparked robust discussions focused on future technologies, facilitating insightful conversations and innovative perspectives.

### Odine & Ribbon Communications: Technology Day

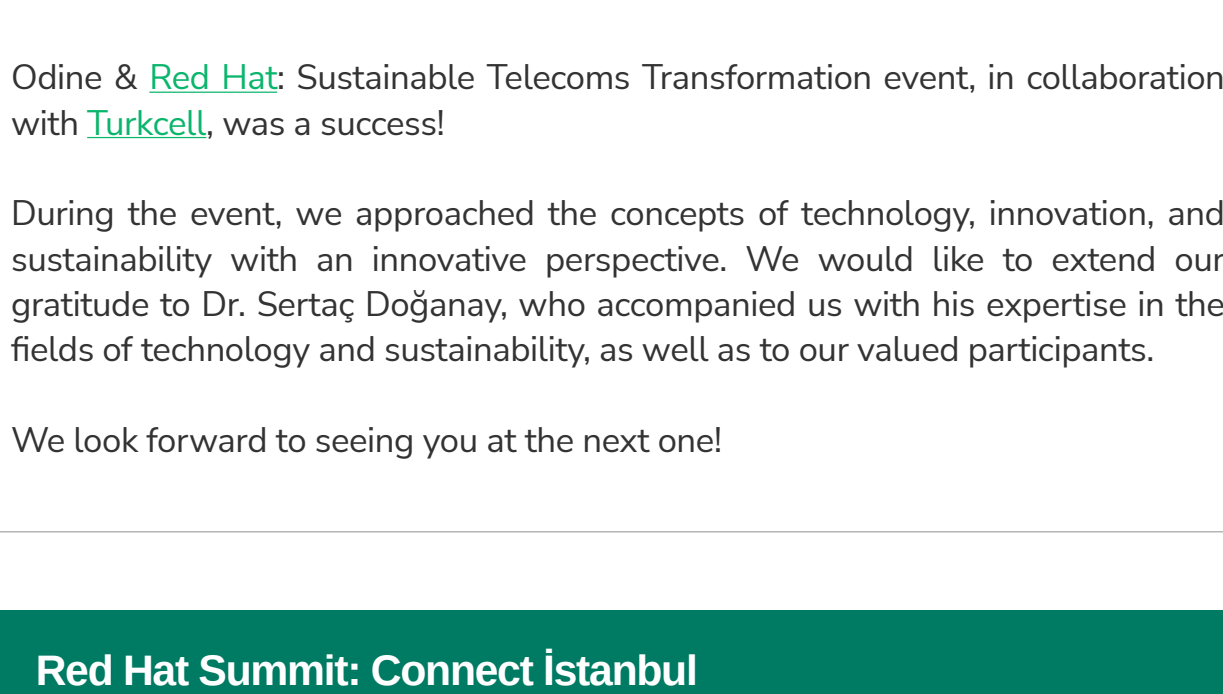

Odine & [Ribbon Communications](#): Technology Day took place on December 14th in Ankara, Türkiye. The event was conducted in partnership with Ribbon Communications and graced by the esteemed presence of our guests from [Turk Telekom](#). We extend our sincere appreciation for the shared commitment to excellence that contributed to the success of this event.

During this event, we bid farewell to a day filled with valuable insights into technology, innovation, and sustainability.

We would like to thank our speakers, Elea Siegele, Robert Gurnell, and Roberto Pérez García, once again, for their valuable contributions. We look forward to embarking on numerous new and similar collaborations to bring forth innovative events together.

### Odine & Red Hat: Sustainable Telecoms Transformation Event

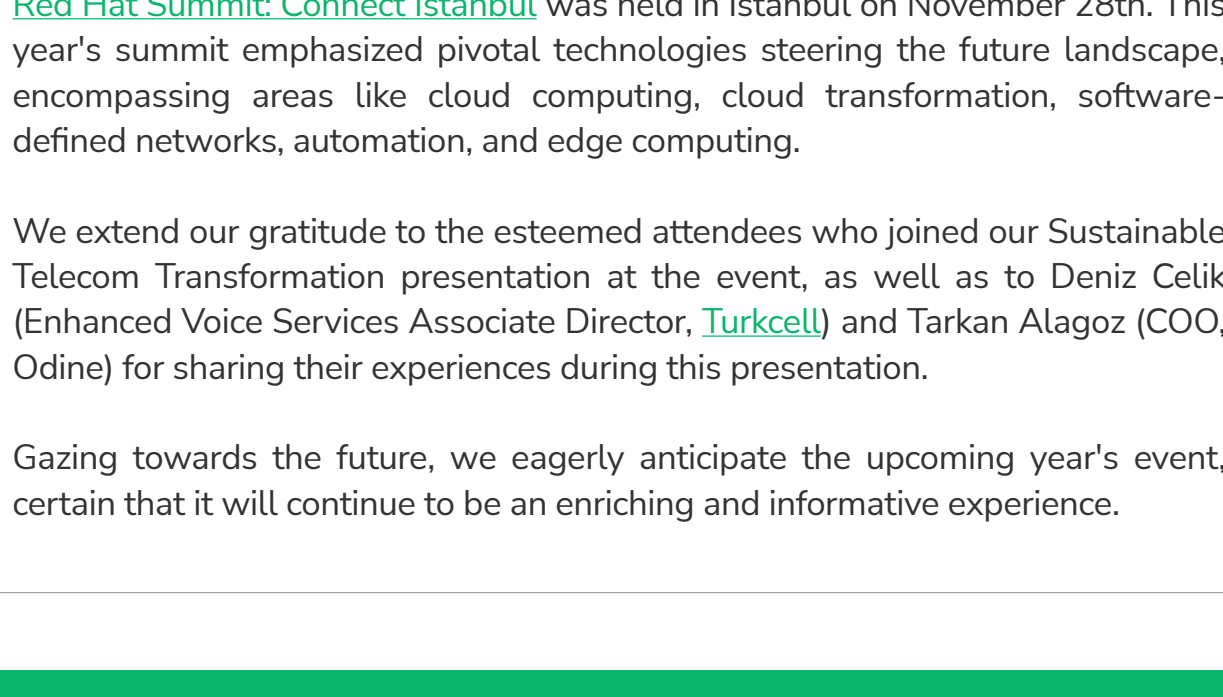

Odine & [Red Hat](#): Sustainable Telecoms Transformation event, in collaboration with [Turkcell](#), was a success!

During the event, we approached the concepts of technology, innovation, and sustainability with an innovative perspective. We would like to extend our gratitude to Dr. Sertaç Doğanay, who accompanied us with his expertise in the fields of technology and sustainability, as well as to our valued participants.

We look forward to seeing you at the next one!

### Red Hat Summit: Connect Istanbul

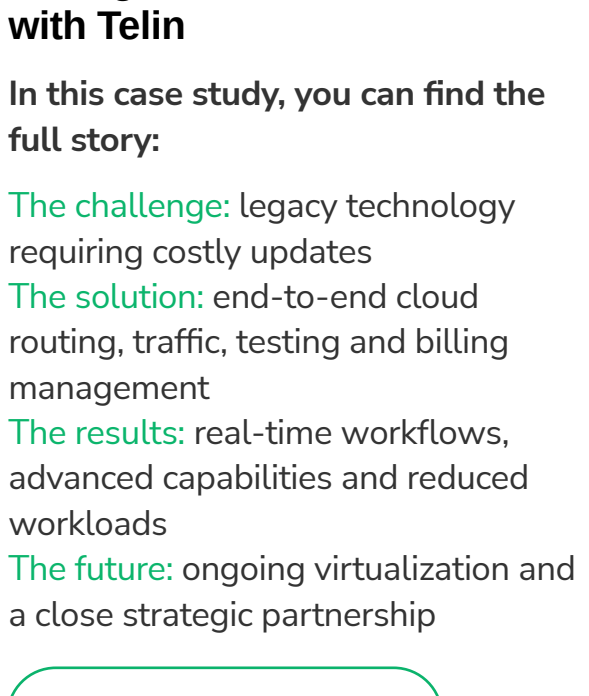

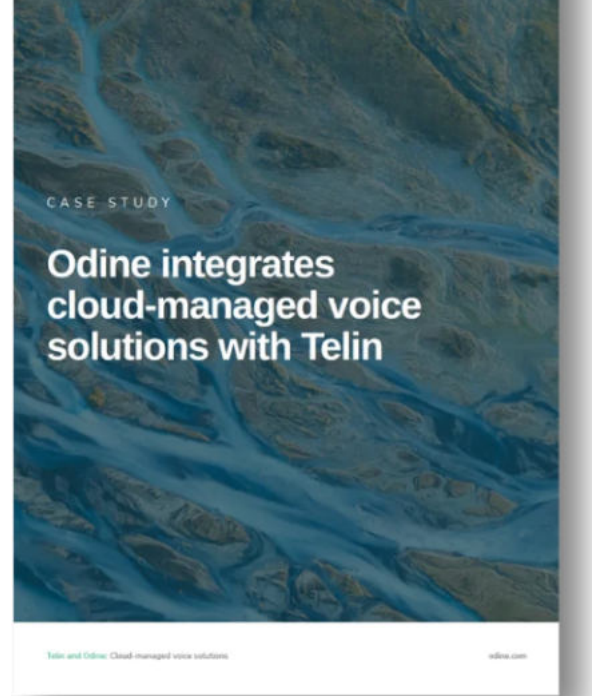

[Red Hat Summit: Connect Istanbul](#) was held in Istanbul on November 28th. This year's summit emphasized pivotal technologies steering the future landscape, encompassing areas like cloud computing, cloud transformation, software-defined networks, automation, and edge computing.

We extend our gratitude to the esteemed attendees who joined our Sustainable Telecom Transformation presentation at the event, as well as to Deniz Celik (Enhanced Voice Services Associate Director, [Turkcell](#)) and Tarkan Alagoz (COO, Odine) for sharing their experiences during this presentation.

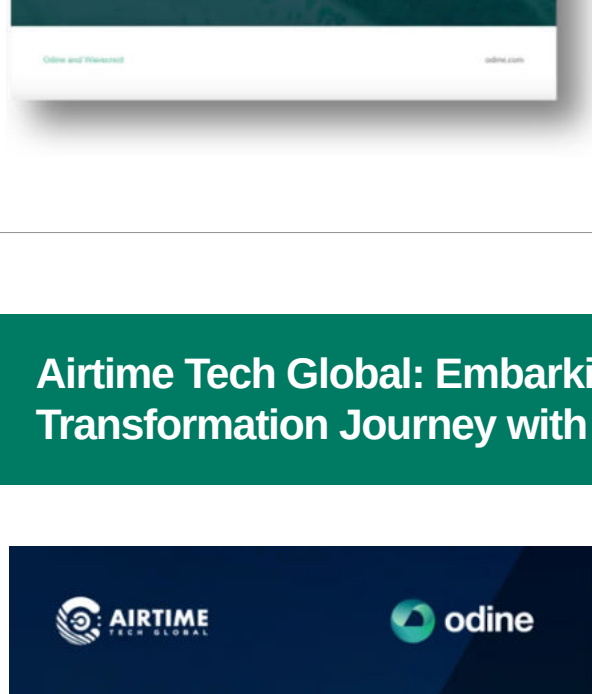

Gazing towards the future, we eagerly anticipate the upcoming year's event, certain that it will continue to be an enriching and informative experience.

### Middle East 2023 GCCM Highlights

[Middle East 2023 GCCM](#) took place from the 6th to the 7th of November in Muscat! The event curated a diverse array of topics, fostering enriching discussions and insights. We had a great event and we look forward to seeing you at the next one!

### Navigating Network Transformation: Odine's Inspiring Success Stories

#### Odine integrates cloud-managed voice solutions with Telin

In this case study, you can find the full story:

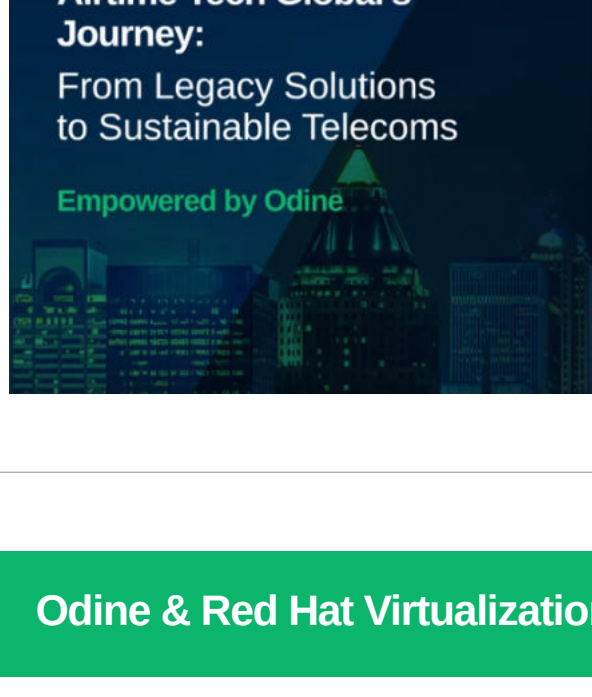

**The challenge:** legacy technology requiring costly updates

**The solution:** end-to-end cloud routing, traffic, testing and billing management

**The results:** real-time workflows, advanced capabilities and reduced workloads

**The future:** ongoing virtualization and a close strategic partnership

[Download Case Study](#) →

#### Transforming an in-house legacy voice platform

In this case study, you can find the full story:

**The challenge:** finding a partner who could deliver best-in-class quality

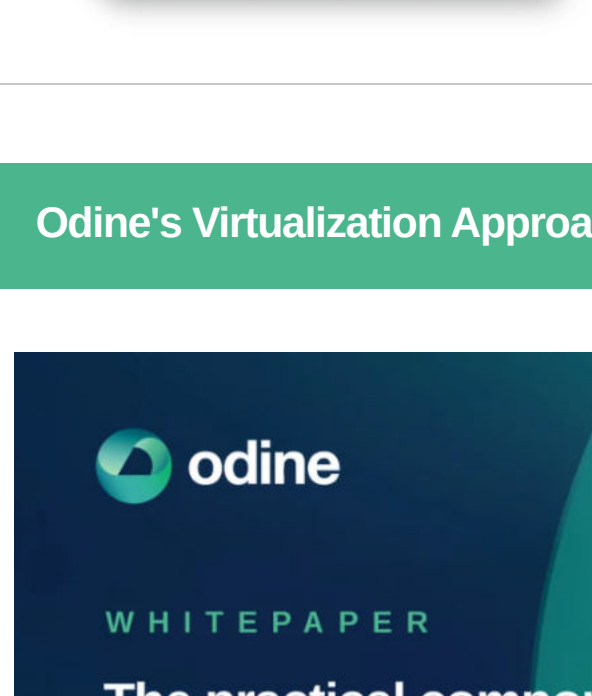

**The solution:** an iterative development process to meet bespoke needs

**The results:** financial, operational and functional transformation

**The future:** a leading partnership that is pioneering innovation

### The building blocks of Sustainable Transformation:

#### Infrastructure Evolution

Hyperscalers have set a new standard for telcos in terms of the agility, flexibility and longevity that define their technology-first infrastructure. Now, it's not just the perfect time for telcos to follow suit, but it's also necessary if they wish to scale and evolve their services in line with the market demands.

#### Environmental Impact

One of the most pivotal drivers and outcomes of telecoms transformation: a positive environmental impact.

This transition is motivated by practical factors, such as the objective to maximize operational efficiency (OPEX) and reduce costs, along with social considerations, particularly the growing public demand for sustainable products and services.
